

 PROFESSIONAL PROFILE

Data Scientist and MuleSoft Certified Developer with a completed Master's degree in Data Science & Artificial Intelligence. Experience combining software development, data engineering, API integrations, business intelligence and machine learning to build end-to-end solutions.

Strong background in Python, SQL, Power BI, MuleSoft, Salesforce integrations, ETL pipelines, web scraping and predictive modeling. Experienced in consulting environments, Agile teams and translating technical results into business insights for decision-making.

 Download PDF

 CORE STRENGTHS

- End-to-end data solutions: extraction, ETL, modeling, dashboards and business insights.
- Strong bridge between software development, analytics and business requirements.
- Enterprise integration experience with APIs, MuleSoft and Salesforce.
- Clear communication of technical results to non-technical stakeholders.

 PROFESSIONAL EXPERIENCE

Programmer Analyst Consultant 2022 – Present
Deloitte

- Design, develop and maintain MuleSoft integrations in Anypoint Platform, connecting enterprise systems through REST APIs and structured data flows.
- Contribute to Salesforce integration projects involving data exchange, API consumption and process automation.
- Build and maintain Python and SQL data processes for analytics, reporting and operational support.
- Collaborate with international Agile teams using Jira, Git and Bitbucket, contributing to requirements analysis, documentation, testing and production support.
- Work with enterprise data structures and SAP-connected environments in integration and data consumption scenarios.

Additional Experience

Technical Service · 2018 – Present — PC repair, OS deployment, preventive maintenance and performance optimization.

Field Hockey Coach, Jockey Club Rosario · 2016 – Present — Team leadership, planning, communication and performance tracking.

Commercial Employee, Ciccioelec S.A. · 2021 – 2022 — Customer support, product catalog management and order tracking.

 SELECTED PROJECTS

The projects below are personal projects developed by me.

Price Intelligence Platform for Construction Materials

Python · Selenium · Pandas · Scikit-learn · CatBoost · Power BI

- Built an end-to-end system that extracts construction material prices from multiple retailers and transforms unstructured web data into comparable historical datasets.
- Developed modular scrapers, cleaning and ETL pipelines, automated exports and a unified dataset covering prices, discounts, categories, sellers and timestamps.
- Trained and compared forecasting models.
- Designed Power BI dashboards for price evolution, discounts, seller behavior and purchasing opportunities, turning model output into business recommendations.

Healthy Pet — Local Business Management System

Python · SQLite · Business Logic · Data Management

- Developed a local management system for customers, recurring orders, products, stock, invoices, payments and account balances.
- Designed business rules for multi-day deliveries, recurring orders and customer-product relationships.
- Implemented persistence, backup logic, balance calculations and data-integrity controls for daily offline operation

Vehicle License Plate Recognition System

Python · OpenCV · YOLOv8 · OCR

- Developed an automatic license plate recognition system using YOLOv8 for detection, OpenCV for image preprocessing and OCR for character extraction.
- Handled varied lighting and camera angles and stored detected plate numbers as structured data for subsequent analysis.

 EDUCATION

Master in Data Science & Artificial Intelligence 2026
EBIS Business Techschool · Completed

Graduate Diploma in Generative AI Application Development 2025
EBIS Business Techschool · Completed

Licentiate in Data Science 2024
Universidad del Gran Rosario · Completed

Programming Technician 2022
Universidad Austral · Completed

 CERTIFICATIONS

MuleSoft Certified Developer 2024

TOEFL English Certification — C1 2024
ETS

 TECHNICAL SKILLS

Data Science & ML

Python, Pandas, NumPy, Scikit-learn, CatBoost, Ridge Regression, feature engineering, model evaluation, backtesting

Analytics & BI

SQL, Power BI, DAX, data modeling, KPI design, dashboards, data cleaning, ETL

Data Engineering

Web scraping, Selenium, REST APIs, JSON/CSV, SQLite, MongoDB, automated data pipelines

Integrations & Tools

MuleSoft, Anypoint Platform, Salesforce, Postman, RabbitMQ, Git, Bitbucket, Jira, SSMS

 LANGUAGES

Spanish
Native

English
Advanced · TOEFL C1

Italian
Intermediate

 CREDENTIALS

Italian citizenship and passport

Driving licenses: Argentina B2/A1 and Italy
